Investigated: Are 'fangames' legal?

By MARK BROWN
Thursday 5 May 2011

Imagine that you've just spent the last eight years of your life toiling away at a tribute to your favourite game series. You've fashioned an exhaustive and comprehensive remake of your most loved game, drawing and coding its 20 characters and 100 stages from scratch.

Hereva hates banality.

Hereva's magic-system, or "**Chaos & Evolutions**" contains six main magics. They are represented on the Impossible Triangle diagram.

The "Chaos & Evolutions" impossible triangle [full resolution here](#)

Reading the "Chaos & Evolutions" impossible triangle :

Starting from the bottom is **Chaosah**, harnessing the primal forces of chaos and physics. Moving to the left we see **Aquah**, the fusion of the forces of chaos and the spirit; quiet and flowing. On the top left is **Ah**, representing the evolution into spiritual beings (beings requiring no physical form). Moving right is **Hippiah**, the evolution of the spiritual and the material to enact growth. Top-right is **Zombiah**, with an emphasis on keeping the spiritual with the physical. Moving down towards chaos is **Magmah**, combining the physical with chaos in ever-changing alchemy.

Pepper & Carrot

Hi! My name is David Revoy and I'm a french CG artist creating an open-source webcomic called Pepper&Carrot. Pepper&Carrot is about "Pepper", a young witch and her cat, "Carrot". They live in a fun fantasy universe made of potions, magic and creatures. It's a comedy/humor webcomic suited for everyone. No mature content, no violence.
